Group I. Claims 24 to 30, drawn to a fumarate salt
(as claimed in claim 24);

Group II. Claims 1 to 6, 8, 18 to 23, 31 to 33 and 42, drawn

number of peripheral blood
lymphocytes comprising
administering to a human in need
thereof a pharmaceutically
effective amount of a compound
having a formula (I);

Group III. Claims 34 to 36, drawn to a method for
suppressing rejection of a skin

Applicants elect Group II (Claims 1 to 6, 8, 18 to 23, 31 to 33 and 42, drawn to a method for suppressing the number of peripheral blood lymphocytes comprising administering to a human in need thereof a pharmaceutically effective amount of a compound having a formula (I).

Species Election Required

A requirement to make a species election is set forth on pages 5 to 8 of the Office Action.

Applicants elect (2R)-2-amino-2-methyl-4{1-methyl-5-[4-(4-methylphenyl)butanoyl]pyrrol-2-yl}butan-1-ol, which is set forth in claim 20 as a compound of formula (I).

The claims that read on the elected species are as follows: claims 1 to 6, 18, 20 and 42.

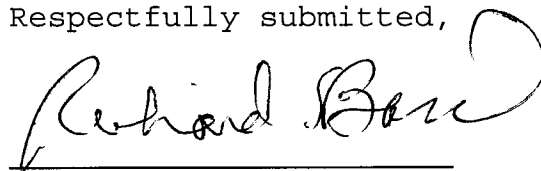

The Restriction Requirement concerning the election of a species is respectfully traversed on the ground that it is not a species requirement of the type set forth in MPEP 803.02 entitled "MARKUSH CLAIMS." It is respectfully submitted that the practice to be applied in the present case and to the extent that the Restriction Requirement is not consistent therewith, it is respectfully traversed.

If, however, the Restriction Requirement is maintained, then taking into consideration that there is a generic claim, it is respectfully requested that the provisions of 37 CFR 1.141(a) and the procedure set forth in MPEP 806.04(d) be followed, which provide that once a claim that is determined to be generic is allowed, applicants should be entitled to consideration of additional species which are written in dependent form or otherwise include all of the limitations of an allowed generic claim.
